PROFILE

Final-year Informatics student with strong interest in Frontend Development and UI/UX Design. Experienced in developing responsive web applications using React.js, Next.js, JavaScript, and RESTful APIs, with additional knowledge in backend development using Node.js and Laravel. Passionate about building user-friendly interfaces, solving problems through technology, and continuously learning modern web development practices.

EDUCATION

UNIVERSITAS GUNADARMA

Bachelor of Informatics

- IPK: 3.79/4.00

(Expected)

2022 – 2026

Pondok Cina. Beji.

Depok. Jawa Barat

SMA SEJAHTERA 01 DEPOK

Science Major (IPA)

- Nilai: 86

2019 – 2022

Jl. Anyelir Raya No.

68. Pancoran Mas,

Jawa Barat

KEAHLIAN	
Programming & Web Development • JavaScript • React.js • Next.js • Node.js • Laravel • HTML • CSS	Keahlian Nonteknis • Problem Solving • Communication Skills • Team Collaboration • Analytical Thinking • Adaptability • Time Management
Tools • Visual Studio Code • Laragon • Postman • Figma • Github • Git • Microsoft Office • Canva	

PELATIHAN	
GO-LANG FOR INTERMEDIATE <i>Universitas Gunadarma</i> Completed a training program on fundamental desktop programming concepts including introduction to programming, Delphi components, control structures, Visual Basic .NET applications, Java basics, and Oracle PL/SQL fundamentals.	02/2025
UI/UX Design <i>Dibimbing</i> Completed UI/UX design training covering user research, wireframing, prototyping, and user interface design using Figma.	12/2024
JavaScript Programming Language Fundamental <i>Universitas Gunadarma</i> Completed training on JavaScript fundamentals including variables, data types, control structures, arrays, loops, and object-oriented programming concepts.	09/2024
Software Engineering Fundamental Course <i>RevoU</i> Completed a 2-week online course covering programming basics, problem solving, and software development fundamentals.	09/2023

C# FOR BEGINNER <i>Universitas Gunadarma</i> Completed training in C# programming focusing on object-oriented programming concepts, data structures, control flow, debugging, and basic web development using the .NET framework.	08/2024
GO-LANG FOR BEGINNER <i>Universitas Gunadarma</i> Completed beginner-level training in Go programming language covering fundamental concepts, variables and data types, control structures, data structures such as struct, slice, and map, as well as building simple web servers and handling JSON data using Go.	02/2024
FUNDAMENTAL DESKTOP PROGRAMMING <i>Universitas Gunadarma</i> Participated in desktop programming training covering fundamental programming concepts, application development using Delphi and Visual Basic .NET, introduction to Java programming, and database programming using Oracle PL/SQL.	08/2023
FUNDAMENTAL WEB PROGRAMMING <i>Universitas Gunadarma</i> Completed training in fundamental web programming covering the basics of web development, including web programming concepts, introduction to Go programming, control structures, and web application development using technologies such as J2EE, JSP, ASP.NET, and C#.	02/2023

PENGALAMAN PROYEK

Proyek Pengembangan Website Kelurahan Kelapa Dua Wetan Jakarta Timur <i>UI/UX Designer Government Website Project</i> - Designed UI/UX for a government service website using Figma. - Created user flow, wireframes, and interactive prototypes. - Collaborated with developers to ensure responsive and user-friendly interface implementation.	09/2025 – 01/2026
Warehouse Management System (WMS) <i>Frontend Developer Web Application</i> - Developed a Warehouse Management System interface for managing inventory and product categorization. - Implemented features for inventory tracking, inbound–outbound processes, and transaction management. - Built authentication system, analytics dashboard, and CRUD functionality for inventory management.	10/2025 – 02/2026
Wedding Planner Booking Website <i>Web Application Development – Laravel</i> - Developed a wedding planner booking web application using Laravel. - Implemented admin dashboard for managing package catalog and orders. - Built CRUD functionality for wedding service packages.	09/2025 – 09/2025

- Technologies: Laravel, PHP, MySQL, Bootstrap.

TrashTracker Website

03/2025 – 07/2025

Full Stack Developer | React.js & Laravel

- Developed a web-based waste reporting platform using React.js and Laravel.
- Implemented real-time map visualization with GPS integration to display waste report locations.
- Built report submission forms and interactive map markers for location-based reporting.
- Developed RESTful API to manage and store reporting data in the backend.

Simple Notes Web App

12/2024 – 01/2025

Full Stack Web Developer

- Built a note-taking web application using Node.js.
- Implemented CRUD functionality (create, read, update, delete) for managing notes.
- Developed server-side data processing using RESTful API architecture.

Sentiment Analysis - Coronavirus Tweets NLP (Kaggle)

11/2024 – 11/2024

Machine Learning Student Project

- Conducted sentiment analysis on Coronavirus Tweets dataset (Kaggle).
- Performed data preprocessing including tokenization, stopword removal, and stemming.
- Applied TF-IDF vectorization and trained machine learning models for sentiment classification.
- Evaluated model performance using accuracy metrics and confusion matrix.

Library Management Web App

10/2024 – 10/2024

Frontend Developer | Next.js

- Developed a Library Management Web Application using Next.js.
- Implemented CRUD functionality and API integration for book data management.
- Designed a responsive and user-friendly interface to improve usability.

Library Management System UI/UX Design

10/2024 – 10/2024

Figma

Contributed to the UI/UX design of a library application using Figma, collaborating with a team to create wireframes and user-friendly interface designs.

RESTful API Book Collection

07/2024 – 08/2024

Backend Developer | Node.js

Designed and implemented a backend RESTful API using Node.js for book data management, including CRUD endpoints and data validation to ensure efficient and reliable data handling.

Coffee Shop Web Application

01/2023 – 03/2023

Team Project | Web Development

- Developed a coffee shop web application that allows users to browse products and place orders online.
- Implemented user authentication system (login & register).
- Built product catalog and detail pages for various coffee beverages.

- Developed shopping cart feature to manage selected orders before checkout.
- Collaborated in a team of 7 developers using Django, PostgreSQL, Tailwind CSS, and JavaScript.
- Payment integration was not implemented yet (order only system).

Numeric Base Converter Web Application

09/2023 – 11/2023

Team Project | Web Development

- Developed a web application for converting numbers between decimal, binary, octal, and hexadecimal.
- Implemented calculator functionality for basic arithmetic operations.
- Built using HTML, CSS, and JavaScript.

Simple Sales Website

06/2021 – 09/2021

Web Developer (Student Project)

Developed a basic sales website using HTML and CSS to present product information and implement fundamental web page layout and styling.

Simple Calculator Application

10/2020 – 10/2020

Software Developer (Student Project)

Developed a basic calculator application using Visual Basic with functionality to perform fundamental arithmetic operations.

Simple Food Menu Application

09/2020 – 09/2020

Software Developer (Student Project)

Developed a simple food menu application using **Visual Basic** that allows users to input and display menu data through a basic graphical user interface.

SERTIFIKASI

Cloud Practitioner Essentials

Dicoding, Berlaku hingga Desember 2027, Nomor Sertifikat: J LX146NJJX72
