📍 Jl. Bakti. GG. Bakti 1. Perumahan Hasanah Residence 3. Blok A4. Pitara Depok

PROFILE

Fresh graduate in Informatics from Universitas Gunadarma with a strong focus on Frontend Development. Experienced in developing responsive web applications using React.js, Next.js, JavaScript, and RESTful APIs, with additional knowledge in backend development using Node.js and Laravel. Passionate about building user-friendly interfaces, solving problems through technology, and continuously learning modern web development practices.

EDUCATION

UNIVERSITAS GUNADARMA

Bachelor of Informatics

- IPK: 3.79/4.00
(Expected)

2022 – 2026

Pondok Cina. Beji.
Depok. Jawa Barat

SMA SEJAHTERA 01 DEPOK

Science Major (IPA)

- Nilai: 86

2019 – 2022

Jl. Anyelir Raya No.
68. Pancoran Mas,
Jawa Barat

PELATIHAN

FUNDAMENTAL WEB PROGRAMMING ⓘ

Universitas Gunadarma

Completed training in fundamental web programming covering the basics of web development, including web programming concepts, introduction to Go programming, control structures, and web application development using technologies such as J2EE, JSP, ASP.NET, and C#.

02/2023

FUNDAMENTAL DESKTOP PROGRAMMING ⓘ

Universitas Gunadarma

Participated in desktop programming training covering fundamental programming concepts, application development using Delphi and Visual Basic .NET, introduction to Java programming, and database programming using Oracle PL/SQL.

08/2023

GO-LANG FOR BEGINNER

02/2024

Universitas Gunadarma

Completed beginner-level training in Go programming language covering fundamental concepts, variables and data types, control structures, data structures such as struct, slice, and map, as well as building simple web servers and handling JSON data using Go.

C# FOR BEGINNER

08/2024

Universitas Gunadarma

Completed training in C# programming focusing on object-oriented programming concepts, data structures, control flow, debugging, and basic web development using the .NET framework.

JavaScript Programming Language Fundamental

09/2024

Universitas Gunadarma

Completed training on JavaScript fundamentals including variables, data types, control structures, arrays, loops, and object-oriented programming concepts.

GO-LANG FOR INTERMEDIATE

02/2025

Universitas Gunadarma

Completed a training program on fundamental desktop programming concepts including introduction to programming, Delphi components, control structures, Visual Basic .NET applications, Java basics, and Oracle PL/SQL fundamentals.

C# FOR INTERMEDIATE

08/2025

Universitas Gunadarma

Sertifikat Pemrograman C# Tingkat Menengah (Intermediate) ini berisi daftar materi yang dipelajari peserta, terutama seputar pengembangan aplikasi web dengan teknologi ASP.Net . Materi mencakup penggunaan Web Form, penerapan Razor Syntax dan pola Model-View-Controller (MVC), akses data melalui ADO.Net , serta pengembangan Web API baik dengan Entity Framework maupun penerapannya pada aplikasi pengguna.

Basic Web Application Design

09/2025

Universitas Gunadarma

Sertifikat ini menunjukkan bahwa peserta telah mengikuti pelatihan dasar perancangan aplikasi web, mencakup pengenalan aplikasi berbasis web, analisis sistem, desain database, desain antarmuka pengguna, serta implementasi menggunakan PHP dan XAMPP. Pelatihan ini memberikan fondasi penting bagi peserta untuk memahami proses perancangan dan pengembangan aplikasi web secara terstruktur.

Sertifikat ini menunjukkan bahwa peserta telah mengikuti pelatihan dasar dalam pengembangan aplikasi web, mencakup pengenalan tools, perancangan sistem, implementasi database dan antarmuka pengguna, serta penerapan konsep ke bahasa pemrograman. Pelatihan ini dirancang untuk memberikan fondasi awal bagi peserta agar mampu memahami dan membangun aplikasi web sederhana secara terstruktur.

PENGALAMAN PROYEK

Scholarship Information Chatbot

05/2026 – 08/2026

FullStack Web Developer | AI Chatbot using RAG and Large Language Models

Developed an AI-powered scholarship information chatbot using Laravel 12, PHP, Blade, Tailwind CSS, JavaScript, Supabase, and the Google Gemini API via OpenRouter. Implemented Retrieval-Augmented Generation (RAG), semantic search, vector database integration, and an admin dashboard for scholarship data management.

SapaCoffee Inventory Management System

06/2026

FrontEnd Developer | BNSP Junior Web Programmer Competency Assessment

Developed a web-based Inventory Management System using Laravel 12, PHP, MySQL, Blade, Tailwind CSS, and JavaScript as part of the BNSP Junior Web Programmer competency assessment. Implemented inventory tracking, authentication, product, category, stock transaction, user management, and PDF reporting features.

Aplikasi CRUD Manajemen Produk Berbasis CodeIgniter dan MySQL

05/2026

Student Project | Frontend Developer

Developed a web-based Inventory Management System using CodeIgniter 4, PHP, MySQL, Bootstrap, HTML, CSS, and JavaScript. Implemented CRUD operations, product image upload, search, category filtering, and inventory management features following the MVC architecture.

Proyek Pengembangan Website Kelurahan Kelapa Dua Wetan Jakarta Timur

09/2025 – 01/2026

UI/UX Designer dan FrontEnd Developer | Government Website Project

- Designed UI/UX for a government service website using Figma.
- Created user flow, wireframes, and interactive prototypes.
- Collaborated with developers to ensure responsive and user-friendly interface implementation.

Inventory Management REST API

12/2025 – 12/2025

Backend/Spring Boot dan Hibernate Developer

- Engineered a RESTful API backend using Java Spring Boot and MVC architecture to manage inventory (*Barang*) and academic (*Mahasiswa*) data efficiently.
- Integrated Hibernate ORM and Spring Data JPA to handle complex database transactions, object-relational mapping, and abstract SQL queries, improving development speed and code maintainability.

- Designed robust Data Access Objects (DAO) and repository layers to ensure clean separation of concerns and secure data retrieval from the MySQL/PostgreSQL database.
- Managed project dependencies and build lifecycle utilizing Apache Maven.

Warehouse Management System (WMS)

10/2025 – 02/2026

Frontend Developer | Web Application

- Developed a Warehouse Management System interface for managing inventory and product categorization.
- Implemented features for inventory tracking, inbound–outbound processes, and transaction management.
- Built authentication system, analytics dashboard, and CRUD functionality for inventory management.

Wedding Planner Booking Website

09/2025 – 09/2025

FullStack Web Developer – Laravel Blade

- Developed a wedding planner booking web application using Laravel.
- Implemented admin dashboard for managing package catalog and orders.
- Built CRUD functionality for wedding service packages.
- Technologies: Laravel, PHP, MySQL, Bootstrap.

TrashTracker Website

03/2025 – 07/2025

FullStack Web Developer | React.js & Laravel Blade

- Developed a web-based waste reporting platform using React.js, Laravel, PHP, MySQL, and Leaflet.js.
- Integrated GPS-based location tracking and interactive maps for real-time waste report visualization.
- Built reporting and report management features to streamline waste monitoring and response.
- Developed RESTful APIs to support efficient data exchange between the frontend and backend.

Simple Notes Web App

12/2024 – 01/2025

FrontEnd Developer | Student Project

- Built a note-taking web application using Node.js.
- Implemented CRUD functionality (create, read, update, delete) for managing notes.
- Developed server-side data processing using RESTful API architecture.

Library Management Web App

10/2024 – 10/2024

Frontend Developer | Next.js

- Developed a Library Management Web Application using Next.js.
- Implemented CRUD functionality and API integration for book data management.
- Designed a responsive and user-friendly interface to improve usability.

RESTful API Book Collection

07/2024 – 08/2024

Backend Developer | Node.js

Designed and implemented a backend RESTful API using Node.js for book data management, including CRUD endpoints and data validation to ensure efficient and reliable data handling.

- Developed a coffee shop web application that allows users to browse products and place orders online.
- Implemented user authentication system (login & register).
- Built product catalog and detail pages for various coffee beverages.
- Developed shopping cart feature to manage selected orders before checkout.
- Collaborated in a team of 7 developers using Django, PostgreSQL, Tailwind CSS, and JavaScript.
- Payment integration was not implemented yet (order only system).
